

Adaptive Single Sign-on Services

Secure Access Everywhere

Successfully managing access in today's digital world presents significant challenges, especially now that stolen access credentials are the leading cause of data breaches. Recognized as a leader by Gartner®, Forrester® and KuppingerCole, Idaptive's cloud-based identity-as-a-service (IDaaS) solution allows users to securely access all the application and services they need with only one set of credentials.

Managing Access is the Problem

PASSWORD SPRAWL REDUCES USER PRODUCTIVITY

With growing application access, users are resorting to password sharing and reuse, exposing corporate data to attacks based on compromised credentials. Compounding this issue is an exponential increase in helpdesk calls and tickets for password resets – reducing IT productivity and user satisfaction.

IDENTITY SILOS IN SAAS AND CLOUD CREATE SECURITY CHALLENGES

A multi-cloud strategy and increased adoption of SaaS apps are resulting in identity silos, thereby increasing attack surfaces, overhead and identity sprawl. Instead of local IAM, use centralized identities and enable federated login into thousands of business applications such as Box, Workday, Concur, Salesforce and popular cloud IaaS providers such as AWS.

USER ACCOUNTS AND PASSWORD MANAGEMENT INCREASES HELPDESK COSTS

Managing and securing access to each individual cloud app and mobile device means managing unique accounts, passwords, and policies across hundreds – often thousands – of endpoints and apps. With so many disparate systems and devices, IT needs a single solution from which to provision users and manage access policy across all apps, from any device that is based on user and device context and risk. Reduce helpdesk volume from forgotten passwords and device enrollment with user self-service.

MANAGING ACCESS POLICIES AND WORKFLOWS CREATE COMPLIANCE HEADACHES

With dozens – or hundreds – of apps in use, controlling which users have access to specific apps becomes unmanageable. Staying on top

of account provisioning is not only cumbersome but also leads to security holes and failed compliance audits if terminated employees have access to corporate apps and confidential data after they leave.

Smarter and Secure Access

Not only does Idaptive provide an easy-to-manage single sign-on (SSO) solution for one-click access to all apps - cloud, mobile, and legacy, but it's also secure and risk aware. Idaptive SSO uniquely leverages behavior and user attributes, enabling a frictionless user experience that is adjusted based on risk, improving productivity and streamlining low-risk access with adaptive single-sign on.

Idaptive SSO solutions provide security, simplicity and control. IT gets one place to manage all accounts and devices. Users get single

Provide Single Sign-on (SSO) to thousands of pre-configured apps with Idaptive Application Services

sign-on across cloud and mobile apps from any device anywhere. Balance tighter security with a seamless user experience through an integrated set of proven capabilities. Experience smarter access management with Idaptive.

Security

- Reduce the security risk of simple, reused and/or improperly managed passwords
- Enable secure, remote access to on-premises apps — without the risks and hassles of VPNs
- Implement a secure BYOD policy with Idaptive’s integrated mobile device management. Secure the Idaptive app on mobile devices by unlocking with NFC, PIN, passcode or fingerprint

Simplicity

- Save time and resources by simplifying authentication while enabling identity management from a centralized location. Users have one credential, IT has consolidated access and control

- Deploy thousands of built-in cloud and mobile apps instantly. Add custom apps. Idaptive’s App Catalog includes many pre-configured applications that support protocols like SAML for SSO and SCIM for provisioning
- Eliminate separate policy silos. Integrate management of cloud, mobile and onsite apps
- Reduce helpdesk tickets for password resets, app requests, and device management, with user self service and automated workflows

Control

- Prove ROI and show compliance with granular app and device reporting
- Enforce user policy from a single authoritative source, applied across devices, apps, and locations
- Provide visibility by monitoring access centrally, giving IT finer controls over the increasing number of users accessing various applications and services across an entire ecosystem

FEATURED HIGHLIGHTS

Single Sign-on

STRENGTHEN SECURITY AND SIMPLIFY AUTHENTICATION

- Simplify app access with SSO for all users
- Improve security by eliminating reused, improperly stored passwords
- Secure app access with adaptive MFA based on device content

Contextual Access Management

ADAPTIVE SSO FOR APPS

- Leverage machine learning and analytics to streamline low-risk access
- Simplify legitimate user access with policy based on user behavior profiles
- Optimize end-user productivity with contextual controls

Secure Directory Services

ENABLE IDENTITY FEDERATION FROM ANYWHERE

- Use the directory of your choice
- Authenticate employees from credentials in Active Directory, LDAP or Google Directory
- Create and store identity in the Idaptive Cloud Directory, and federate from a single source

App Gateway – Secure Remote Access

LIMIT ACCESS WITH DEDICATED, PER-APP GATEWAY

- Reduce attacks by providing only specific app access
- Eliminate security gaps with seamless access policy and MFA
- Stop breaches that establish network foothold via VPN connections

Real-time Identity Intelligence

ENSURE GREATER VISIBILITY

- Build custom dashboards to understand IT risk, as well as user experience
- Stop threats in progress with prioritized, risk-based alerts from applications
- Offer rich tools to drill into details to better comprehend access and events

Idaptive delivers Next-Gen Access, protecting organizations from data breaches through a Zero Trust approach. Idaptive secures access to applications and endpoints by verifying every user, validating their devices, and intelligently limiting their access. Idaptive Next-Gen Access is the only industry-recognized solution that uniquely converges single sign-on (SSO), adaptive multi-factor authentication (MFA), enterprise mobility management (EMM) and user behavior analytics (UBA). With Idaptive, organizations experience secure access everywhere, reduced complexity and have newfound confidence to drive new business models and deliver kick-ass customer experiences. Over 2,000 organizations worldwide trust Idaptive to proactively secure their businesses. To learn more visit www.idaptive.com.
